

STATE BORDER GUARD SERVICE OF UKRAINE
Bohdan Khmelnytskyi National Academy of
the State Border Guard Service of Ukraine

APPROVED
Rector of the National Academy of the State
Border Guard Service of Ukraine
Major General O. Shynkaruk
«26» April 2018

EDUCATIONAL PROGRAM

the first (bachelor's) level of higher education

Specialty 274 «Automobile Transport»

Branch of knowledge 27 «Transport»

Qualification: «Bachelor of Automobile Transport»

Professional qualification “Officer of tactical level”

PASSED BY
the Academic Council of the Academy
(Protocol No.15 of “24” April 2018)

Khmelnytskyi 2018

PREFACE

Developed by the working group consisting of:

1. Chmyr Victor Mykolaiovych – Candidate of Technical Sciences, associate professor, assistant professor of the Transport Means and Special Purposes Equipment Department, the B. Khmelnytskyi National Academy of the State Border Guard Service of Ukraine. (Head of the project group - guarantor of the educational program).
2. Ostashevskiy Serhii Anatoliiiovych – Doctor of Technical Sciences, associate professor, Head of the Transport Means and Special Purposes Equipment Department, the B. Khmelnytskyi National Academy of the State Border Guard Service of Ukraine (member of the project group).
3. Hunko Andrii Veniaminovich – Candidate of Technical Sciences, associate professor, assistant professor of the Transport Means and Special Purposes Vehicles Department, the B. Khmelnytskyi National Academy of the State Border Guard Service of Ukraine (member of the project group).

Reviews of external stakeholders are provided by:

1. Bukoiemskiy Serhii Leonidovich – Deputy Director of the Arms, Technical Support and Communication Department, Head of the Arms and Technical Equipment, Administration of the State Border Guard Service of Ukraine.
2. Skydanenko Pavlo Mykolaiovych – Deputy Director of the Resources' Provision Department, Administration of the State Border Guard Service of Ukraine.
3. Sahno Volodymyr Prohorovich – Deputy Director of the Automobiles Department of the National Transport University, member of the Transport Academy of Sciences of Ukraine, Excellent Worker of Education of Ukraine, Honoured Worker of the Transport of Ukraine, Honoured Worker of Education of Ukraine, Doctor of Technical Sciences, associate professor.
4. Lobashov Olexii Olehovych – Head of the Transport Systems and Logistics Department, the O.M. Beketov Kharkiv National University of Urban Economy, Doctor of Technical Sciences, associate professor.

**Profile of
the educational program in the specialty of
274 «Automobile Transport»**

1. General information	
Full name of higher educational institution and structural unit	Bohdan Khmelnytskyi National Academy of the State Border Guard Service of Ukraine. Department of Transport Means and Special Purposes Equipment
Degree of higher education and the name of the qualification in the language of original	Bachelor of Automobile Transport Tactical Level Office
Official name of the program	Automobile Transport
Type of diploma and program volume	Single, 240 ECTS credits, 3 years 10 months.
Accreditation available	Ministry of Education and Science of Ukraine. 10 years
Cycle/Level	NQF of Ukraine - 7th level, FQ-EHEA - 1st cycle, EQF-LLL – 6th level.
Preconditions	Complete general secondary, professional (vocational), special pre-higher education.
Language (-s) of teaching	Ukrainian
Validity of the educational program	2021
Internet address of permanent location for the description of the educational program	http://www.nadpsu.edu.ua
2. The purpose of the educational program	
To provide education in the field 27 «Transport» in the specialty 274 «Automobile Transport», which ensures employment in the State Border Guard Service of Ukraine. Training of tactical level officers who are competent in management of border guard units, being personally responsible for their actions and capable of further training with a high level of autonomy.	
3. Characteristics of the educational program	
Subject area (branch of knowledge, specialty, specialization)	Branch of knowledge - 27 «Transport». Specialty - 274 «Automobile Transport»
Orientation of the educational program	The educational program has an applied orientation with a professional emphasis on the development of competencies necessary for solving the current problems of ensuring the state border security at the tactical level.
The main focus of the educational program and specialization	Special education in the field of knowledge 27 «Transport» Special education in the field of knowledge 274 «Automobile Transport». Keywords (for the speciality block): proper selection of projecting technologies, preparation and organisation of transport exploitation in the State border guard units and in the transport service centers, management of diagnostics processes, maintenance and reconstruction of transport means efficiency and performance. Keywords (for the MPC block): Operational and service activity, border guard unit, protection of the state border and sovereign rights of

	Ukraine in its exclusive (maritime) economic zone, activities technical support, transport means exploitation.
Particularities of the program	Requires practical training in the state border guard units.
4. Employability of graduates and adaptivity for further education	
Employability of graduates	Primary officers' positions of the State Border Guard Service of Ukraine (other military arms formed in accordance with the laws of Ukraine), according to the military occupational specialty: 260200, 261000, 420100, 220100.
Further training	Continuation of studying at master's programs in automobile transport obtaining the qualification of an operational-tactical level officer.
5. Teaching and assessment	
Teaching and training	Problem-based and context training. Activity and competency-oriented technologies. Practical execution of combat training missions, practical in-service training and daily activities.
Assessment	Forms of control: oral and written questioning, tests (including computer testing), results presentation of practical in-service training (practice), reports for individual tasks, modular tests, credits, differentiated credits, examinations, certification (qualification work defence). Assessment of educational achievements is carried out as: - current control – according to the four-point scale ("excellent", "good", "satisfactory", "unsatisfactory"), verbal scale ("credited", "not credited"); - the final control – according to the four-point scale ("excellent", "good", "satisfactory", "unsatisfactory"), ECTS scale ("A", "B", "C", "D", "E", "FX", "F"); 100-point scale; verbal scale ("credited", "not credited").
6. Program competencies	
6.1. Integral competence	
IC-1	Ability to solve complex specialized and practical problems in the field of automobile transport in the process of professional activity or training, which involves application of principles, theories and methods of fundamental, technical, technological, informatics, social and economic sciences and is characterized by complexity and uncertainty of the conditions.
6.2. General competencies	
GC-1	Ability to act with responsibility and awareness on patriotic principles, possess social position based on democratic convictions, humanistic and ethic values.
GC-2	Ability to communicate verbally and in writing in Ukrainian (as the national language) and foreign languages in professional, social and cultural spheres, using professional terminology. Ability to aware enlarging communicative skills in professional sphere throughout the life.
GC-3	Ability to think abstractedly, analyse, synthesize and anticipate.
GC-4	Ability to identify, put and solve issues, to use knowledge in professional situations, understand and utilise the ideas and thoughts and generate new ideas.
GC-5	Ability to use information and communication technologies, to study and master new skills.
GC-6	Ability to communicate with representatives of other professional groups of different levels (with experts of other branches/fields of economic activity)

GC-7	Ability to search, process and analyse information from various sources.
GC-8	Ability to work in team using skills of interpersonal interaction, estimation and respect for cultural diversity, motivate people to move to their common aim.
GC-9	Ability to adapt and act in current situation, to be critic and self-critic.
GC-10	Ability to carry out safe activities preserving the environment.
GC-11	Ability to work autonomously, evaluate and provide the quality of completed missions.
6.3. Professional (specialized, subject) competencies	
6.3.1. Professional competencies in specialty	
PC1-1	Ability to use knowledge of government regulations, legal acts of Ukraine, standards, instructions and recommendations on operation, maintenance and service works of transport means and their systems in professional activity.
PC1-2	Ability to use knowledge of automobile transport infrastructure, movement and transportation organisation, to differentiate automobile transport means and their element constituents.
PC1-3	Ability to conduct measuring process and evaluate its results following the knowledge on metrology, standardization and certification methods.
PC1-4	Ability to apply the acquired knowledge for the development and implementation of technological processes, technological equipment and technological inventory, automation and mechanization facilities for the production, operation, repair and maintenance of road vehicles, their systems and components.
PC1-5	Ability to carry out activity on development, execution and implementation documentation on the certainty of technological processes of production, operation, repair and maintenance of automobile transport objects, their systems and other instructions, rules and methods.
PC1-6	Ability to develop, taking into account aesthetic, strength and economic parameters, technical requirements and specifications for the design of road vehicles and infrastructure of automobile transport, its systems and individual elements; to plan the location of equipment, technical facilities and organization of workplaces, to calculate the loading of equipment and indicators of product quality.
PC1-7	Ability to organize technological processes of production, diagnostics, maintenance and repair of road vehicles of automobile transport, their systems and elements.
PC1-8	Ability to apply methods and means of technical measurements, technical regulations, standards and other regulatory documents for technical diagnostics, maintenance and repair of road vehicles of automobile transport, their systems and elements.
PC1-9	Ability to use modern software for development of design and technological documentation for the creation, operation, repair and maintenance of road vehicles of automobile transport, their systems and elements.
PC1-10	Ability to analyse technical and economic and operational indicators of road vehicles of automobile transport, their systems and elements in order to identify and eliminate negative factors and improve the efficiency of the production process.
PC1-11	Ability to take an active part in scientific research and experiments, analyse, interpret and model individual phenomena and processes based on existing scientific concepts with the formulation of reasoned conclusions in professional activity.
PC1-12	Ability to apply mathematical and statistical methods in the collection, systematization, synthesis and processing of scientific and technical information, preparation of reviews, annotations, abstracts, reports and bibliography on research objects; to take part in scientific discussions and procedures for the protection of scientific works and presentations of various levels and reports on the subjects of conducted researches; to be able to share and popularize professional knowledge, to conduct educational work.
Competencies selected by the educational institution	

Additional professional specialisation <i>«Organization of technical support of operative and service activity »</i>	
6.3.2. Competencies selected by the educational institution	
PC2-1	Knowledge and understanding of the legal principles of state functioning and the fundamentals of Ukrainian legislation concerning the powers of the state, human rights and the limits of their application for the state border security; democratic values; systems providing national security of Ukraine; the essence and basic issues of the ethics of armed combat; the purpose of officer's profession.
PC2-2	Understanding of the system and processes of ensuring of state border security, integrated border management model, functioning of the subsystems of state border guarding, methods forces and means deployment (including service animals), assessment of their effectiveness.
PC2-3	Ability to organize state border protection in the area of responsibility, to assess its compliance with the predicted state of unlawful activity and enemy's actions, to perform border control and border guard service, to act as part of border patrols, to conduct operational, technical measures, investigative activities, coercive measures, to plan and organize preventive measures.
PC2-4	Understanding of the basics of combined arms operations, combat operations of border units, tactics and methods of units' actions, organization of combat, resource, engineering and technical support and communication in a unit under different conditions and in various forms of operational and service activities.
PC2-5	Ability to counteract physical and armed resistance of armed offenders, to endure physical activities without reducing professional ability to perform operational tasks.
PC2-6	Ability to use organic weapons of the unit during operational and service activities and execution of combat missions.
PC2-7	Ability to drive basic combat vehicles of the unit, organize preparation of weapons, special equipment and technical means of border guarding for their use; operation and maintenance based on their construction, engineering knowledge and compliance with the requirements of the common design documentation system.
PC2-8	To use communication facilities, software and hardware systems, organic for the State Border Guard Service of Ukraine, in the operational and service activities of the state border guard units.
PC2-9	To possess the basics of psychological knowledge, technologies of creative psychological thinking, psychological tools for study of personality and small social groups, theoretical and methodical foundations of general and military pedagogy, features of implementation of modern personality-oriented technologies into training and education of the personnel of state border guard units.
PC2-10	To apply the basic provisions of the administrative law on conducting proceedings in cases of administrative offences with drawing up of administrative procedural documents.
6.3.3. Competencies selected by cadets	
PC3-1	Ability to organize the operation of road vehicles of automobile transport and objects of transport infrastructure in accordance with the requirements of normative and technical documents and regulatory legal acts of Ukraine.
PC3-2	Ability to organize production activities of structural units of enterprises, small groups of performers (brigades, divisions), in relation to production, operation, repair and maintenance of objects of automobile transport, their systems and elements, including the substantiation of technology of production processes.
PC3-3	Ability to organize the operation of the reporting and accounting system (managerial, statistical, technological) of the structural units of the enterprises of automobile transport, to carry out administrative management, documenting and quality management in accordance with regulations, instructions and techniques.

PC3-4	Ability to plan effectively and organize efficiently professional activities; to use organizational skills to plan the work of automobile transport unit personnel.
PC3-5	Ability to implement measures for the organization and planning of the activities of technical support units in a limited time and lack of complete information at a high level.

Additional professional specialization	
Organization of housing and exploitation support of operational and service activity"	
6.3.2. Competencies selected by the educational institution	
PC2-1	Knowledge and understanding of the legal principles of state functioning and the fundamentals of Ukrainian legislation concerning the powers of the state, human rights and the limits of their application for the state border security; democratic values; systems providing national security of Ukraine; the essence and basic issues of the ethics of armed combat; the purpose of officer's profession.
PC2-2	Understanding of the system and processes of ensuring of state border security, integrated border management model, functioning of the subsystems of state border guarding, methods forces and means deployment (including service animals), assessment of their effectiveness.
PC2-3	Ability to organize state border protection in the area of responsibility, to assess its compliance with the predicted state of unlawful activity and enemy's actions, to perform border control and border guard service, to act as part of border patrols, to conduct operational, technical measures, investigative activities, coercive measures, to plan and organize preventive measures.
PC2-4	Understanding of the basics of combined arms operations, combat operations of border units, tactics and methods of units' actions, organization of combat, resource, engineering and technical support and communication in a unit under different conditions and in various forms of operational and service activities.
PC2-5	Ability to counteract physical and armed resistance of armed offenders, to endure physical activities without reducing professional ability to perform operational tasks.
PC2-6	Ability to use organic weapons of the unit during operational and service activities and execution of combat missions.
PC2-7	Ability to drive basic combat vehicles of the unit, organize preparation of weapons, special equipment and technical means of border guarding for their use; operation and maintenance based on their construction, engineering knowledge and compliance with the requirements of the common design documentation system.
PC2-8	To use communication facilities, software and hardware systems, organic for the State Border Guard Service of Ukraine, in the operational and service activities of the state border guard units.
PC2-9	To possess the basics of psychological knowledge, technologies of creative psychological thinking, psychological tools for study of personality and small social groups, theoretical and methodical foundations of general and military pedagogy, features of implementation of modern personality-oriented technologies into training and education of the personnel of state border guard units.
PC2-10	To apply the basic provisions of the administrative law on conducting proceedings in cases of administrative offences with drawing up of administrative procedural documents.
6.3.3. Competencies selected by cadets	
PC3-1	Ability to organize material and technical support of operational and service activities of state border guard units.

PC3-2	Ability to organize the work of the border guard housing maintenance unit to ensure operational and service activity at a high level.
PC3-3	Ability to organize and implement processes for the organization and repair of buildings and structures, in accordance with approved plans, norms and requirements, instructions and solutions depending on the operating conditions.
PC3-4	Ability to organize the accounting and write-off of material assets in the units of the nomenclature of housing maintenance.
PC3-5	Ability to draw up draft agreements, estimates for the material resources purchase; the ability to assess the events on legal positions, use current legal acts in professional activity.
7. Program learning outcomes	
7.1. Program learning outcomes in specialty	
PLO-1	To apply knowledge of fundamental sciences to study professionally-oriented disciplines, carry out professional activities using information technology, "Information databases", Internet-resources, software tools and other information and communication technologies.
PLO-2	To comply with the requirements of labour protection, safety, fire safety and sanitary and hygienic regime in the course of professional activity.
PLO-3	To follow the principles of deontology and ethics in professional activity, norms of communication in professional interaction with colleagues, chief staff, subordinates, to work effectively in a team.
PLO-4	To carry out professional communication in modern Ukrainian language, analyse the texts of professional orientation and translate foreign language information sources.
PLO-5	To plan and implement the professional activity on the basis of normative and legal acts of Ukraine, rules of technical operation of automobile transport of Ukraine, instructions and recommendations on operation, repair and service of road vehicles of automobile transport, their systems and elements.
PLO-6	To develop and implement technological processes, technological facilities and technological equipment, means of automation and mechanization in the production, operation, repair and maintenance of road vehicles of automobile transport, their systems and elements.
PLO-7	To develop technical tasks and technical conditions for the design of automobile transport objects, its systems and separate elements; to plan the location of facilities, technical equipment and organization of workplaces, to determine the composition and area of premises, to calculate the loading of equipment and indicators of product quality.
PLO-8	To develop managerial decisions concerning the further functioning of structural units of the enterprise with the assessment of their products quality.
PLO-9	Organize production activities of structural units, small teams of performers (brigades, divisions), in relation to the production, operation, repair and maintenance of road vehicles of automobile transport, their systems and elements, to ground the technologies of production processes.
PLO-10	To organize the operation of road vehicles of automobile transport, their systems and elements.
PLO-11	To use methods and means of technical measurements, technical regulations, standards and other regulatory documents for the technical diagnostics of road vehicles of automobile transport, their systems and elements.
PLO-12	Use modern software tools for development of design and technological documentation for the creation, operation, repair and maintenance of road vehicles of automobile transport, their systems and elements.
PLO-13	To analyse technical-economic and operational indicators of road vehicles of automobile transport, their systems and elements.

PLO-14	Apply mathematical and statistical methods in collecting, systematizing, generalizing and processing scientific and technical information, participating in scientific research and experiments.
Program learning outcomes selected by educational institution	
Additional professional specialisation <i>« Organization of technical support of operative and service activity »</i>	
7.2. Program learning outcomes selected by educational institution	
PLOei-1	To know the legal principles of functioning of the state and the system of ensuring the national security of Ukraine; structure of the national security and defence sector, especially functioning and interaction of its components; basics of functioning and structure of international and national organizations in the field of international relations and security of state borders under the conditions of integration processes; events related to the history of border guarding, wars and military conflicts
PLOei-2	To carry out border control and border guarding functions, to perform legal and law enforcement activities in different conditions of the situation, to work out relevant documentation, reports, and to draw up procedural documents.
PLOei-3	To manage combined arms and border units (decision-making, planning, motivation and control) during daily operational and service activities, combat operations under various conditions of the situation using communication equipment and telecommunication facilities.
PLOei-4	To organize complex functioning of the state border guard organization subsystems, to use forces and means in different conditions of the situation and all types of combat, resource and engineering support.
PLOei-5	To organize the use of cynologists and service dogs in the state border protection.
PLOei-6	To use organic weapons of the unit, to handle weapons and engage targets using small arms as determined by the Gunnery Manual of the State Border Guard Service of Ukraine.
PLOei-7	To apply personal safety and physical training techniques, as well as special measures pursuant to the legislative acts, the Personal Safety Manual and the Physical Training Guidelines of the State Border Guard Service of Ukraine.
PLOei-8	To organize measures for the safety of the unit and its personnel functioning in different conditions, to confidently perform the first aid and tactical medicine procedures.
PLOei-9	To drive vehicles in accordance with state standards, including under extreme driving conditions.
PLOei-10	To organize measures of moral and psychological support, professional training of personnel, preparation of border patrols and units to perform assigned tasks in different conditions.
PLOei-11	To apply knowledge of the standards of the European Code of Ethics and the National Code of Border Guard Ethics; human rights principles, traditions of the border guard service, requirements of the standards of the culture of the border guard service and border control; the principles of freedom and justice and healthy lifestyles.
PLOei-12	Apply the provisions of legal acts on border issues in official activity.
7.3. Program learning outcomes selected by cadets	
PLOc-1	To analyse phenomena and processes in professional activity with the formulation of reasoned conclusions.
PLOc-2	To organize the operation of road vehicles of automobile transport, their systems and elements in subordinate units.
PLOc-3	To identify the objects of automobile transport, their systems and elements, to formulate and provide suggestions on the expediency of their use in professional activities.
PLOc-4	Organize and plan trainings for the use and maintenance of technical and transport vehicles in complicated operating conditions when changing the environment.

Additional professional specialisation <i>«Organization of housing maintenance of operational and service activities »</i>	
7.2. Program learning outcomes selected by educational institution	
PLOei-1	To know the legal principles of functioning of the state and the system of ensuring the national security of Ukraine; structure of the national security and defence sector, especially functioning and interaction of its components; basics of functioning and structure of international and national organizations in the field of international relations and security of state borders under the conditions of integration processes; events related to the history of border guarding, wars and military conflicts.
PLOei-2	To carry out border control and border guarding functions, to perform legal and law enforcement activities in different conditions of the situation, to work out relevant documentation, reports, and to draw up procedural documents.
PLOei-3	To manage combined arms and border units (decision-making, planning, motivation and control) during daily operational and service activities, combat operations under various conditions of the situation using communication equipment and telecommunication facilities.
PLOei-4	To organize complex functioning of the state border guard organization subsystems, to use forces and means in different conditions of the situation and all types of combat, resource and engineering support.
PLOei-5	To organize the use of cynologists and service dogs in the state border protection.
PLOei-6	To use organic weapons of the unit, to handle weapons and engage targets using small arms as determined by the Gunnery Manual of the State Border Guard Service of Ukraine.
PLOei-7	To apply personal safety and physical training techniques, as well as special measures pursuant to the legislative acts, the Personal Safety Manual and the Physical Training Guidelines of the State Border Guard Service of Ukraine.
PLOei-8	To organize measures for the safety of the unit and its personnel functioning in different conditions, to confidently perform the first aid and tactical medicine procedures.
PLOei-9	To drive vehicles in accordance with state standards, including under extreme driving conditions.
PLOei-10	To organize measures of moral and psychological support, professional training of personnel, preparation of border patrols and units to perform assigned tasks in different conditions.
PLOei-11	To apply knowledge of the standards of the European Code of Ethics and the National Code of Border Guard Ethics; human rights principles, traditions of the border guard service, requirements of the standards of the culture of the border guard service and border control; the principles of freedom and justice and healthy lifestyles.
PLOei-12	Apply the provisions of legal acts on border issues in official activity.
7.3. Program learning outcomes selected by cadets	
PLOc-1	To plan and organize the work of housing unit of the border guard detachment maintenance
PLOc-2	To conduct calculations and control expenditures of fuel and energy resources during the heating season, take measures for their economical spending in units.
PLOc-3	To plan and organize work on municipal services, maintenance, repair of buildings and facilities.
PLOc-4	To organize the provision of units with the property of housing and communal services, organize records keeping, reporting and write-offs of property.
PLOc-5	To make energy resources limits for the border units and control their spending.
8. Resource support for the program implementation	

Staffing	<p>The staffing meets the licensing requirements in terms of staffing requirements for conducting educational activities in the sphere of higher education, which is confirmed by such indicators:</p> <ul style="list-style-type: none"> - for the educational program implementation the Engineering and Technical Faculty includes such departments: Transport Means and Special Purposes Equipment Department; Engineering Support and Border Guard Technical Means Department; Department of Communication, Automatization and Cybersecurity; Telecommunications and Radio Engineering Department; General Scientific and and Engineering Disciplines Department; Logistics Department. The Administration Department is responsible for the training of higher education trainees in this specialty; - the working group, which is responsible for the training of higher education trainees in this specialty, consists of three workers of academic staff; - head of the project group (guarantor of the educational program) – candidate of technical sciences (specialty 20.02.14), associate professor (assistant professor of the Transport Means and Special Purposes Equipment Department), 24 years of experience as a as scientific and pedagogical worker. Other scientific and pedagogical workers, who are planned to be involved in the implementation of the educational program, have degrees and/or academic ranks, as well as a confirmed level of scientific and professional activities. It is possible to involve foreign experts and specialists of other educational and scientific institutions, establishments and organizations in the educational process on the basis of agreements / contracts / memoranda / protocols / consents concluded within the framework of international and inter-university cooperation, as well as representatives of the relevant level of qualification of the state border guard institutions, Regional Directorates, Administration of the State Border Guard Service of Ukraine.
Materiel and technical support	<p>The materiel and technical support meets the licensing requirements in terms of technological requirements for conducting educational activities in the sphere of higher education, which is confirmed by such indicators:</p> <ul style="list-style-type: none"> - availability of premises for conducting training sessions and control activities not lower required standards; - provision of multimedia equipment for simultaneous use in classrooms – 30%; - available social infrastructure: libraries with a reading room, dining rooms, a cultural centre, an assembly hall, sports halls and playgrounds, an occupational health facility; - provision of higher education trainees with hostels – 100%.
Information, teaching and training support	<p>The information, teaching and training support meets the licensing requirements in terms of technological requirements for conducting educational activities in the sphere of higher education, which is confirmed by such indicators:</p> <ul style="list-style-type: none"> - provision of the library with domestic and foreign specialized periodicals of the corresponding or related profile – 8 publication names; - access to databases of periodical scientific publications in English of the corresponding or related profile; - description of the educational program; - curriculum and explanatory note.
9. Academic mobility	

National credit mobility	<p>Individual academic mobility is realized within the framework of inter-university agreements / contracts / memoranda on the establishment of scientific and educational relations to meet the needs of the development of education and science with such institutions: the National Academy of National Guard of Ukraine (Kharkiv), the Ivan Cherniakhovskyi National Defence University of Ukraine (Kyiv), the Ivan Ohienko National University of Kamianet-Podilskyi, the Lviv State University of Internal Affairs, the Institute of Information Technologies and Training Resources of the National Academy of Pedagogical Sciences of Ukraine (Kyiv), the Hetman Petro Sahaidachnyi National Army Academy (Lviv), the Kirovohrad Flying Academy of the National Aviation University, National Prosecution Academy of Ukraine (Kyiv), the Academician Stashis Scientific Research Institute for the Study of Crime Problems of the National Ukrainian Academy of Law Sciences (Kharkiv), the Institute of Department of State Guard of Ukraine of the Taras Shevchenko National University of Kyiv.</p> <p>In addition, leading experts from the relevant higher educational institutions of Ukraine may be involved in the management of the scientific work of the trainees on the individual conditions.</p> <p>It is allowed to transfer credits received in other higher educational institutions of Ukraine, provided that the acquired competencies are relevant.</p>
International credit mobility	<p>International credit mobility and international educational and scientific and technical cooperation of educational institutions are provided in accordance with signed international documents, in particular:</p> <p>The Memorandum of Understanding and Cooperation between Educational Institutions in a number of EU Member States and Eastern Partnership Countries (since 2017);</p> <p>The Protocol between the Bohdan Khmelnytskyi National Academy of the State Border Guard Service and the High School of International Relations and Public Communication (Chelm, Republic of Poland, 2011);</p> <p>The Memorandum of Understanding between the Bohdan Khmelnytskyi National Academy of the State Border Guard Service and the Higher School of Police (Szczytina, Republic of Poland, 2011);</p> <p>Annual plan of cooperation between NASBGS and the Training Centre named after the Soldiers of Border Guards (Kętrzyn, Republic of Poland).</p>
Training of foreign students obtaining higher education	<p>It is provided in case of conclusion of international agreements with observance of information security procedures.</p>
